eware

Your solution to print collateral and order management

# eware

eware is an online order and inventory management solution that allows organisations and users to order, store and track their materials.

It's powerful backend provides clients the ability to have a branded online enterprise portal through which their collateral can be ordered, packed, distributed and tracked.

## Reporting

eware provides clients the facility to view stock levels 24hrs a day, 7 days a week, via our online warehouse.

Users can log in to their secure account through their designated eware domain address, view and manage their inventory.

Users can generate & export reports on stock levels and usage at the click of a mouse. In addition, standard and custom reports can be scheduled to auto generate and distribute to approved users.

## Inventory Management & Alerts

**eware** is a powerful inventory management tool with a wide array of functionality. Manage artwork, minimum stock level notifications, SKU properties, product limits and access.

## Storage

Melbourne Mail Management's warehouse is ready to receive any size delivery of materials. Our warehousing team will receive,

**eware** is also a repository for artwork. When a reprint is required, users will automatically be notified with the relevant artwork to be printed. **eware** constantly monitors & replenishes collateral as needed.

reconcile and palletise your delivery ready for warehousing.

## Customisation & Intergration

**eware** is a flexible platform that allows clients to brand the interface, reports and alert notifications using corporate branding and colours. The "look and feel" of **eware**'s "front and back end" can be tailored so

the user can feel they are directly logging in and utilising the company's system. Personalised domain addresses are achieved by using subdomain addressing e.g <http://company.eware.net.au>.

## Ordering

Using **eware**, organisations have the ability to provide their customers online collateral ordering via either a user based portal,

public microsite or, using our API, integrate **eware** directly into their website's backend.

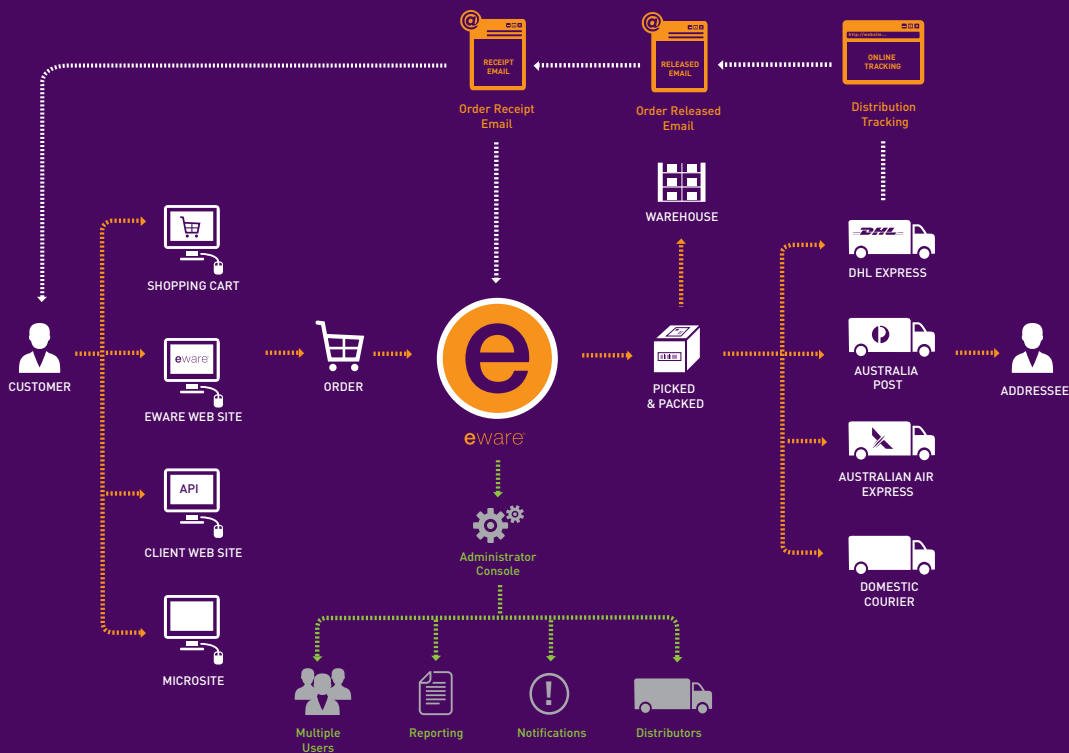

## Order Tracking

**eware**'s ability to distribute your orders via a preferred distributor, ensures transparent and reduced distribution costs. Orders

can be tracked via a URL link that takes the recipient and user directly to the distribution company's online tracking site.

# Overview...
